

Shaili Srivastava

Bangalore, India | +91 9305201801 | shailisrivastava0905@gmail.com
LinkedIn | GitHub

Computer Science undergraduate with strong foundations in OOP, Data Structures Algorithms (250+ problems solved), and Full-Stack Development. Skilled in building REST APIs and production-ready web apps using Java, JavaScript, Python, React.js, Node.js, FastAPI, and Docker. Quick learner experienced in Agile collaboration, Git workflows, and independently mastering new technologies.

Technical Skills

Programming Languages: Java, JavaScript, Python, SQL, Ruby **Software Engineering:** Object-Oriented Programming (OOP), Data Structures & Algorithms, Software Development Life Cycle (SDLC), Debugging, Unit Testing, Problem Solving, REST APIs **Frontend:** React.js, Next.js, HTML5, CSS3 **Backend:** Node.js, Express.js, FastAPI **Databases:** MongoDB, MySQL **Tools & Platforms:** Git, GitHub, Postman, Windows, Vercel, Docker

Projects

Campus Connect (MERN Stack) Developed a full-stack software application using MongoDB, Express.js, React.js, and Node.js. Designed and implemented REST APIs and modular software components for user and community management. Performed testing, debugging, and continuous improvements throughout the software development life-cycle.

RepoMind RAG Matcher

GitHub

Next.js — FastAPI — Python — Docker — ChromaDB — SentenceTransformers

- Built a cloud-ready full-stack RAG platform that parses resumes and semantically matches candidates to job descriptions using FastAPI and Python.
- Designed scalable REST APIs and implemented semantic search using SentenceTransformers and ChromaDB for efficient candidate matching.
- Containerized the application with Docker and developed a responsive recruiter dashboard using Next.js.
- Independently learned Retrieval-Augmented Generation (RAG), vector databases, and embedding-based search to design and implement the complete system.

SAMAYRA – AI-Powered Fashion Intelligence Platform

GitHub

HTML5 — CSS3 — JavaScript — Browser APIs — Local Storage

- Developed an intelligent fashion recommendation platform with personalized recommendations.
- Implemented browser-based personalization with persistent local storage.
- Designed responsive modular UI and camera-assisted recommendation workflow.
- Improved user engagement through personalized experiences.

Nova Finance – Intelligent Personal Finance Manager

GitHub

Node.js — REST APIs — HTML5 — CSS3 — JavaScript

- Developed a full-stack finance platform supporting budgeting and recurring transactions.
- Designed REST APIs with persistent server-side storage.
- Built interactive dashboards with CSV export and financial analytics.
- Improved backend performance through optimized request handling.

Professional Experience

RD Info Technology — Full Stack Developer Intern

Jun 2024 – Jul 2024 Contributed across the

Software Development Life Cycle (SDLC), including application development, testing, debugging, API integration, and software maintenance. Developed, tested, and deployed 15+ REST APIs using Node.js, Express.js, and Postman, improving application reliability and backend functionality. Collaborated with frontend developers and team members using Git in an Agile development environment to implement features, resolve bugs, and maintain clean, modular code. Quickly learned unfamiliar tools and project workflows through independent research to contribute effectively to ongoing development tasks.

Motion Cut — Frontend Developer Intern

Jun 2024 – Jul 2024 Developed responsive web

applications using React.js, HTML, CSS, and JavaScript. Performed coding, testing, debugging, and maintenance of

frontend components to improve software quality and user experience. Worked collaboratively with developers using Git while following software development practices.

ENIGMA Club — UI/UX Designer & Head of Operations

Apr 2024 – Present

- Led cross-functional technical and design initiatives for university events.
- Designed user-centric interfaces and prototypes improving accessibility and usability.
- Improved operational workflow efficiency by 30%.

Education

Jain University, Bangalore

2023–2027

Bachelor of Technology (B.Tech) in Computer Science and Engineering

CGPA: 8.1/10

Relevant Coursework: Artificial Intelligence, Machine Learning, Computer Vision, Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks, Software Engineering

Achievements

- Built 5+ software applications using software engineering principles, REST APIs, databases, and modern development tools.
- Solved 250+ DSA problems across LeetCode and GeeksforGeeks.
- Maintained 30+ GitHub repositories.
- Designed intelligent applications using LLMs, RAG, LangChain and RESTful backend architectures.

Certifications

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
- Google AI Essentials
- Microsoft Cloud Computing
- Accenture Nordics Software Engineering Job Simulation
